- Superior adhesion eliminating drumminess and delamination
- Excellent impact and mechanical strengths

SURFACE PREPARATION

All surfaces to be free of oil, dust, loose mortar prior to application over **Render One Skim Coats**.

NATURAL

Natural Coat (bag colour Beige)

MIXING DIRECTIONS

1. All Render One Top or finishing coats will be mixed with a 4:1 water/polymer ratio
2. Pour approximately four and a half (4.5) litres of the diluted Render One polymer into a clean empty 15 litre pail
3. Gradually add the selected Render One natural render and mix with a variable speed/high torque mixing drill fitted with a suitable spiral mixer.
NB: Over mixing of high speed mixing may cause aerating which can affect usability.

APPLICATION GUIDE

1. Mix thoroughly to a workable consistency and apply to substrate using hawk and trowel or approved render spray pumps
2. Remove excess product in a horizontal motion with a steel trowel
3. Using a Render One plastic trowel, float product utilizing a fast, firm circular arm motion to achieve a seamless flat, Natural Render Texture

PAINTING GUIDE

- Allow at least 48 hours to dry before painting
- Paint with two (2) coats of a high quality acrylic membrane of paint

GUARANTEE

Ten year guarantee when applied by an approved applicator to Render One Specifications
